

Red Ruffles Azalea (Azalea x 'Red Ruffles')

Red Ruffles Azalea (Rutherfordiana hybrid) is a showy evergreen shrub with beautiful deep cerise blooms. The ruffled texture of the flowers (see first photo) is striking when it blooms in the spring. It can grow to be 2-4 feet tall and wide and can make a beautiful hedge.

Plant Care: The red ruffles azalea is easy to care for. It likes thick mulch around it, especially in the winter for protection from the cold.

Watering: This plant needs to be watered regularly to maintain evenly moist soil. It may need to be watered several times each week. However, it does not like to be standing in water.
