

## **Florida Anise** ***Illicium floridanum* 'Pink Frost'**

Pink Frost Illicium (Florida Anise) is a vigorous, medium-sized, evergreen native shrub with an upright growing habit up to 6-10 feet tall and wide. It has elliptic, dark green leaves adorned with creamy edges; the foliage turns pink-rose in cold weather. In Spring, pretty dark red flowers bloom for 6-8 weeks.

**Plant Care:** Plant this shrub in full to partial shade. It is easily grown in moist soil and tolerates wet planting sites. Generally, this plant is pest- and disease-free. Minimal pruning works to control shape and size. Both the foliage and fruit are poisonous to livestock.
